The Entrance, Considered
As Architecture.

ARCHITECTURAL GATE COLLECTION

VELA

THE DESIGN

A horizontal line, drawn in aluminum.

Vela is composed of broad horizontal blades set at measured intervals — a rhythm of aluminum and light that reads as architecture rather than enclosure. The generous plank profile gives the gate weight and presence, while the narrow reveals between blades keep sightlines calm and admit slender bands of daylight across the drive.

Powder-coated metal construction holds a soft, even matte through coastal seasons. Each Vela is fabricated to order and drawn to the proportions of its entry.

CUSTOM OPTIONS

ORIENTATION

Horizontal · Vertical

FINISH

Powder Coated · Electrostatic Painted

STANDARD COLORS

BLACK

A rich architectural black.

WHITE

A clean contemporary white.

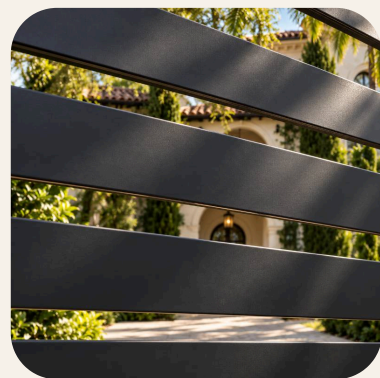

BRONZE

A warm architectural bronze.

Custom colors available upon request.

Custom fabrication available to accommodate project-specific dimensions, configurations and architectural requirements.

ARCHITECTURAL GATE COLLECTION

RIVA

THE DESIGN

An open rhythm of slat and light.

Riva arranges slender horizontal slats at even, open intervals — a transparent screen that defines the property line without closing the view. Light moves freely through the profile, casting a measured cadence of shadow across drive and garden, while the clean geometry sits quietly against masonry piers and tropical planting.

Powder-coated metal construction keeps the finish even and durable through coastal seasons. Each Riva is fabricated to order and proportioned to its entry.

A warm architectural bronze.

Custom colors available upon request.

Custom fabrication available to accommodate project-specific dimensions, configurations and architectural requirements.

ARCHITECTURAL GATE COLLECTION

PIERO

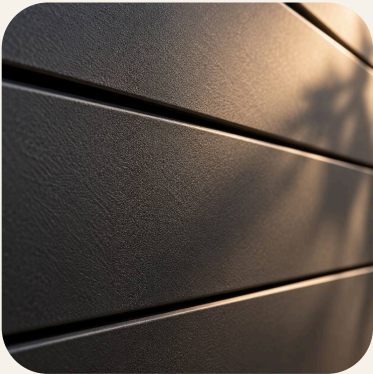

THE DESIGN

A quiet plane of solid aluminum.

Piero is drawn as an uninterrupted surface — wide flush panels meeting in fine shadow lines, composed for full privacy without visual weight. The panel joints trace a calm horizontal rhythm across the plane, catching low light as thin dark seams that give the gate its architectural character.

Powder-coated metal construction keeps the broad surfaces even and durable through coastal seasons. Each Piero is fabricated to order and proportioned to its entry, holding its own beside stone piers and contemporary facades.

ARCHITECTURAL GATE COLLECTION

FORTE

THE DESIGN

A monolith, framed in shadow.

Forte presents a single solid plane held within a fine recessed frame — full privacy carried by one uninterrupted surface. The border reads as a quiet shadow line around each panel, giving the gate the composed proportions of cabinetry at architectural scale.

Powder-coated metal construction keeps the broad face even and durable through coastal seasons. Each Forte is fabricated to order and proportioned to its entry, standing calmly between stone piers and contemporary facades.

ARCHITECTURAL GATE COLLECTION

LIVO

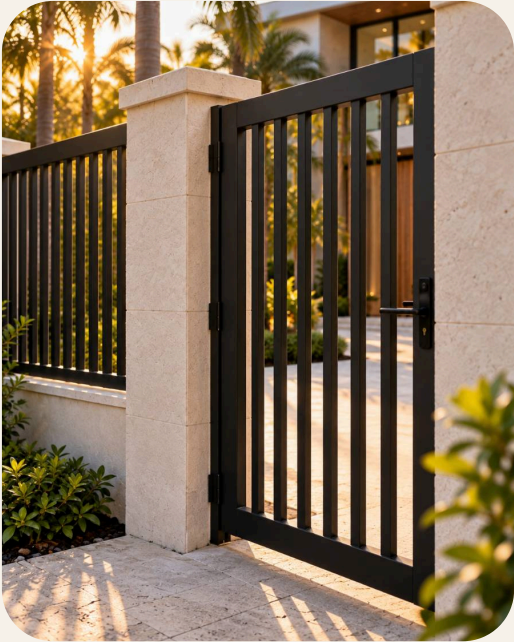

THE DESIGN

A vertical cadence,
open to the light.

Livo sets slender vertical bars at an even, open spacing — a classical picket rhythm restated in clean contemporary aluminum. The upright profile lifts the composition, keeping views to the garden open while the bars catch low sun as alternating lines of light and shadow.

Powder-coated metal construction keeps every bar crisp and durable through coastal seasons. Each Livo is fabricated to order and proportioned to its entry.

Custom Options & Important Notes

Every Prime Gates design can be customized to fit the architectural character, dimensions and functional requirements of your property.

ORIENTATION	Horizontal or Vertical
FINISH	Powder Coated or Electrostatic Painted
STANDARD COLORS	Black · White · Bronze
CUSTOM COLORS	Available upon request
CUSTOM FABRICATION	Available for project-specific dimensions, configurations and design requirements.
ADDITIONAL OPTIONS	Matching pedestrian gates, automation and access control solutions are available upon request.

IMPORTANT NOTES

All designs shown in this catalog are for visual reference purposes only.

Final proportions, spacing, panel layout and overall appearance may vary depending on gate dimensions, site conditions, selected configuration and fabrication requirements.

Colors shown may vary slightly from the final finished product due to lighting, photography, display settings and coating variations.

All final specifications are confirmed prior to fabrication.
